

Adjustable Zip Boxes

NEW!

Nonmetallic Boxes

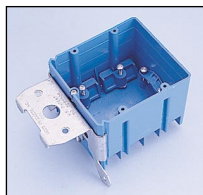

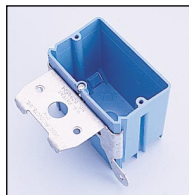

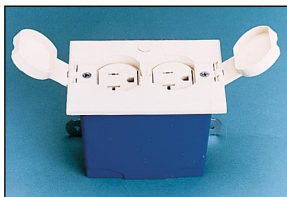

Carlson® is proud to introduce our new Adjustable Zip Boxes. These boxes offer the same durability as our original line of Zip Boxes, with a twist – a single adjustment screw that adjusts the depth of the box to fit any situation!

The Adjustable Zip Boxes are available in two types:

- The **Adjustable Floor Box** has a full 21 cubic inch capacity and comes complete with a nonmetallic cover plate, duplex receptacle, integral molded clamps,

mounting bracket and all necessary hardware for installation. It is UL Listed and classified for fire resistance and UL514 Scrub Water Tested.

- Carlson's **Adjust-A-Box™ Wall Boxes** are available in single gang with a 21 cubic inch capacity and double gang with a 34 cubic inch capacity. Each has a mounting bracket and adjusts to any wall thickness. These are UL Listed and classified for two hour fire resistance.

Part No.	Volume (cu. in.)	Description	Standard Carton Qty.	Std. Carton Weight (lbs.)
