

# Carlon® PE X-Flex™ Split Duct

Carlon® PE X-Flex™ split duct is used in underground applications where extra flexible protection and identification are needed. This product is manufactured from low density polyethylene with narrow corrugations, providing a high degree of flexibility.

It's available in a bright orange color for quick identification, and is manufactured in four sizes, 1", 1 1/4", 1 1/2" and 2". PE X-Flex comes in convenient sized coils and special lengths can be ordered upon request.

## Features & Benefits

- No Special tools necessary, simply twist locks together
- Easy installation with lightweight coils
- Pre-split design for easy installation over existing cables
- Flexible corrugated design, promptly adapts to cable orientation
- Bright orange color for quick identification
- Available in 1" to 2" for protecting single or multiple cables

## Specifications

Part No.	Size	Material	Type	Color	Coil Length
L5D3E1JNNA250	1"	Low Density PE	Corrugated X-Flex™ Split	Orange	250 ft coil
L6D3E1JNNA250	1-1/4"	Low Density PE	Corrugated X-Flex™ Split	Orange	250 ft coil
L9D3E1JNNA250	1-1/2"	Low Density PE	Corrugated X-Flex™ Split	Orange	250 ft coil
L13D3E1JNNA100	2"	Low Density PE	Corrugated X-Flex™ Split	Orange	100 ft coil
